OLD carton no.	Folder no.	Description
21	36	Notes of a conversation with Judge Francis W. Finch on the subject of the accuracy of the Creation story of the Pentateuch. Dated Jan. 15, 1880.
21	34	Small scrapbook of mounted newspaper clippings. Esp. "Science and Religion: Prof. [John] Tyndall's Address to the British Association [for the Advancement of Science]," Belfast, Ireland, August 20, 1874. Fr. N. Y. Tribune, signed by correspondent G[orge] H[ashburn] S[alley] (1833-1916), noted journalist and long a correspondent for the <u>Tribune</u> (1861-95) and the <u>London Times</u> (1895-1905). Also, clippings concerning address by Thomas Henry Huxley, delivered in Belfast two days before Tyndall's.
22	--	1870's "Private Journal," kept while at Yale (Sept. 16, 1868-April 5, 1869; Nov. 29, 1871; Dec. 31, 1893) and in Ithaca (Sept. 1-2, 1871; July 13, 1872). Frequent references made to Otiniel Charles Marsh (1831-99), paleontologist, Barvardian, and pioneer in the study of the evolution of the horse; WS studied with Marsh. Important entry of Sept. 30, 1868, in which WS records reactions to and thoughts on Darwin's <u>Origin of Species</u> .
22	--	Black notebook, Journal, dated Sept. 29, 1888-July 24, 1892 and April 3, 1904-Oct. 9, 1905. Most entries concern religious questions, Biblical interpretation, relations of science and religion; also, entries on evolution, heredity, and related subjects. Important undated entry, pp. 40-42 [probably written between Oct. 1892-Jan. 1893], "The Theory of the Origin of Species by Natural Selection," concerned with a comparison of Darwin's theory and the work of pre-Darwinian ecologist Robert Bakewell (1769-1843). Also, essay entitled "The Christian in Science," undated, pp. 45-47, 51-54, 59-61; see esp. p. 23, paragraph beginning, "Evolution of organisms is an undoubted fact."
22	21	Title page and preface from projected, but never published, book: "Organics: an exposition of the principles of Evolution exhibited in the phenomena of Living Organisms." Based on course given at Yale (see next items). (Preface, first page, might be worth exhibiting.)
22	20	Introduction to course at Yale, "The Principles of Evolution." Dated Sept. 30, 1899. The first two pages give a summary of the history of Williams' teaching of this subject at Yale. Also includes a summary of the content of the course (see esp. p. 7) and an attached printed outline of the course as it was given in 1899-1900.

OLD carton no.	Folder no.	Description
23	5	Manuscript essay, dated 1906, revealing plan of H.S.'s research since 1881. To demonstrate the fact of evolution by geologic studies, H.S. selected a geologic period (Devonian of New York State) for which succession in time could be established, and he then traced the modifications of form of certain species through long series of strata to obtain evidence of the evolution of these species. (Essay is unfinished and was probably presented in its completed form at a society meeting? 5 pp.) See esp. p. 1, paragraph 3.
23	23	Typewritten essay by H.S.: "Variation versus Heredity," marked "author's copy," dated August 15, 1897. 12 pp. Concerned with relative importance of variation and heredity in evolution by natural selection; suggests the importance of studying mutability. (Page 5 might be worth exhibiting.) Essay may be revised version of a paper on the same subject which was published in <u>Science</u> sometime before Dec. 21, 1897 (see next item); perhaps this revision was used as a speech.
23	23	Letter from Henry Fairfield Osborn (1857-1935), paleontologist and professor of zoology at Columbia University. Osborn gives a brief discussion of his own views on the mechanism of evolution in connection with a comment on H.S.'s article in <u>Science</u> . Dated Dec. 21, 1897. 2 pp.
24	1	Book of photographs. Includes Charles Darwin and Ernst Haeckel (1834-1919) on facing pages. (Haeckel, biologist and philosopher, was one of the first German advocates of organic evolution. He enunciated the principle "Ontogeny recapitulates phylogeny," that is, the life history of an organism (individual) recapitulates the stages in the evolution of the race to which that individual belongs.) Also, photo of Richard Owen (1804-92), great English comparative anatomist and zoologist and contemporary of Darwin. (Photos may be removed from frames.)
25	23	"Theory of Origins: Closing lecture in the course on Historical Paleontology or History of Organisms & Theories of Origins." Undated. Marked "1st delivered in spring of 1885/Cornell University." This is an altered and augmented version of a lecture delivered before Cornell Natural History Society, April 16, 1885 (see folder 21). Summary of Darwin's theory on pp. 11-12.
25	Hard-cov. #1	Table of contents for lectures on Organic Evolution, delivered at Yale (1903-04) and at Cornell (1904-05). Revisions made in second year are indicated. For lectures on Darwin, see second page of table.
25	Hard-cov. #23	Mounted clipping from Cornell University Register, 1904-1905, describing course in Organic Evolution which was new at Cornell and dated from the appointment of H.S. in 1904.

OLD carton no.	Folder no.	<u>Description</u>
25. Hard-cov. 323		Essays by James Chester Bradley, in 1905 (spring) a 3rd year student in the Arts College. He took a course in Organic Evolution, which was given in three consecutive terms, 1904-05. These three short papers are undated, but were probably written in the spring of 1905 when HSB devoted several lectures to the <u>Origin of Species</u> .

Calendar of HSW correspondence and other papers concerning the basis for election of members to the Yale Chapter of Sigma Xi, 1897:

1. ALS to HSW from Henry W. Farnam, New Haven, Conn., March 23, 1897 re favoring a return to Sigma Xi's original policy of electing members nominated by the committee on the basis of their general scholarship.
2. Ms. draft of HSW letter to Henry W. Farnam, New Haven, Conn., March 29, 1897 re decision at Saturday meeting to appoint a council (consisting of Frederick E. Beach, Betram B. Boltwood, and HSW) to consult with the faculty "to keep the society in harmony with the best interests of the school."
3. TLS to HSW from Henry W. Farnam, New Haven, Conn., March 30, 1897 re appointment of a faculty committee of Professors Chittenden, Wells, and Farnam to meet with the Sigma Xi committee.
4. TLS to HSW from Henry W. Farnam, New Haven, Conn., April 1, 1897 re setting 7:30 p.m., April 2 as the time for the meeting.
5. ALS to HSW from Henry W. Farnam, New Haven, Conn., April 3, 1897 re the faculty opinion that the recent election policy was "too narrow and therefore not for the best interests of the Scientific School." Farnam's unofficial suggestion, which does not necessarily represent the view of the Governing Board, is that a supplementary election be held to enlarge the membership from the present senior class. However, "the question of ways and means is left to the wisdom and loyalty of the members of Sigma Xi."
6. Ms. draft to Frederick E. Beach, President of the Yale Chapter of Sigma Xi, April 3, 1897 re HSW's opinion that acting on the faculty committee's advice would be "a violation of both the letter and the spirit of the constitution of Sigma Xi." He suggests that the matter be laid before the chapter to determine its constitutionality.
7. Ms. copy of a motion passed by Sigma Xi at meeting April 10, 1897. The motion acknowledges the suggestion by the Governing Board of the Sheffield Science School that Sigma Xi membership be open to all its students. The society, however, insists that the constitutional restrictions on membership must limit the society's membership unless the election procedure is amended.
8. TLS to HSW from Henry W. Farnam, New Haven, Conn., April 13, 1897 re the Governing Board's policy of non-interference.
9. MLS to Frederick E. Beach from HSW, Yale University, April 17, 1897 (not send but first part communicated) re Professor Farnam's reply of April 13 closing official action. Williams, fearing that members of the Scientific School may wish to withdraw from the society, would prefer to see the society disbanded rather than have its members "suffer any reproach."
10. Ms. draft to Henry W. Farnam from HSW, Yale University, April 17, 1897 re HSW assumption of full responsibility for Sigma Xi's foundation as "a society in Yale University which holds to the heresy that there may be standards of excellency in scholarship that the current marking system does not accurately discriminate."

Calendar of HSW correspondence and other papers concerning the basis for election of members to the Yale Chapter of Sigma Xi, 1897:

1. ALS to HSW from Henry W. Farnam, New Haven, Conn., March 23, 1897 re favoring a return to Sigma Xi's original policy of electing members nominated by the committee on the basis of their general scholarship.
2. Ms. draft of HSW letter to Henry W. Farnam, New Haven, Conn., March 29, 1897 re decision at Saturday meeting to appoint a council (consisting of Frederick F. Beach, Betram B. Boltwood, and HSW) to consult with the faculty "to keep the society in harmony with the best interests of the school."
3. TLS to HSW from Henry W. Farnam, New Haven, Conn., March 30, 1897 re appointment of a faculty committee of Professors Chittenden, Wells, and Farnam to meet with the Sigma Xi committee.
4. TLS to HSW from Henry W. Farnam, New Haven, Conn., April 1, 1897 re setting 7:30 p.m., April 2 as the time for the meeting.
5. ALS to HSW from Henry W. Farnam, New Haven, Conn., April 3, 1897 re the faculty opinion that the recent election policy was "too narrow and therefore not for the best interests of the Scientific School." Farnam's unofficial suggestion, which does not necessarily represent the view of the Governing Board, is that a supplementary election be held to enlarge the membership from the present senior class. However, "the question of ways and means is left to the wisdom and loyalty of the members of Sigma Xi."
6. Ms. draft to Frederick E. Beach, President of the Yale Chapter of Sigma Xi, April 3, 1897 re HSW's opinion that acting on the faculty committee's advice would be "a violation of both the letter and the spirit of the constitution of Sigma Xi." He suggests that the matter be laid before the chapter to determine its constitutionality.
7. Ms. copy of a motion passed by Sigma Xi at meeting April 10, 1897. The motion acknowledges the suggestion by the Governing Board of the Sheffield Science School that Sigma Xi membership be open to all its students. The society, however, insists that the constitutional restrictions on membership must limit the society's membership unless the election procedure is amended.
8. TLS to HSW from Henry W. Farnam, New Haven, Conn., April 13, 1897 re the Governing Board's policy of non-interference.
9. MLS to Frederick E. Beach from HSW, Yale University, April 17, 1897 (not sent but first part communicated) re Professor Farnam's reply of April 13 closing official action. Williams, fearing that members of the Scientific School may wish to withdraw from the society, would prefer to see the society disbanded rather than have its members "suffer any reproach."
10. Ms. draft to Henry W. Farnam from HSW, Yale University, April 17, 1897 re HSW assumption of full responsibility for Sigma Xi's foundation as "a society in Yale University which holds to the heresy that there may be standards of excellency in scholarship that the current marking system does not accurately discriminate."
