Introduction

The records in boxes 33, 43 and 44 (accession #2688), first identified by Mr. Richards in his box listing as early or historical material, have been listed by folder heading and analysed where some sub-series seemed apparent.

The material, correspondence, minutes, financial records, speeches, memoranda, etc. covers the period 1921 to 1934, with 3 file folders 1945-1949. In all there are 109 files and 1 package of slides relating to the establishment of the Committee on the Regional Plan of New York and Environs under the guidance of Charles D. Norton, the appointment of Thomas Adams as Director of the Plan and Surveys, to the publication of the Plan and the formation of the Regional Plan Association in 1931 with almost identical personnel to the Committee.

The files have been divided into 10 sub-series but it is most strongly stressed that this is a tentative arrangement because such a small fraction of accession #2688 of the Regional Plan Assoc. has been analysed. For instance 12 additional 16-inch boxes contain other letter designated files (e.g. PR, SG, EN) and 16 16-inch boxes contain numbered files (up to #282). See the appended listing for the location of these files. Because the material in boxes 33, 43, and 44 deals with the development of the Plan and Association and with prominent figures, it is in demand and so it is submitted that some organization, however short-lived, may be useful.

The sub-series are listed in chronological order by covering dates, and each sub-series is arranged alphabetically by file folder tab.

Charles D. Norton, whose inspiration and masterminding brought the Committee on the Regional Plan of New York and Environs into existence under the aegis of the Russell Sage Foundation, died suddenly of pneumonia in March 1923. According to a letter of 20 January 1924 to Frederic Delano who succeeded Norton as chairman of the Committee (f.f. "Frederic A. Delano 1926-1928", Box 44, #2688) Norton's papers were kept in a suitcase at the Committee office for nearly a year, and then it was suggested that the secretary pick over the papers and discard any duplicate or un-

related material. On the assumption that this was carried out, these papers are then the Regional Plan collection of Charles Norton papers, 1921-1923, 1930, and include material by and about Norton. It would appear that folders with the heading "Charles D. Norton" and a sub heading may have been Norton's own files, but the folders are in such poor physical condition that positive identification is difficult. Also worth mentioning is a photocopy of a privately printed letter:

Norton, Charles D. The Plan of New York with References to the Chicago Plan. A letter from Charles Norton to Frederic A. Delano. Printed by the Committee for Private Circulation, New York, May 1923. New York City, Rudge.

Copy 359/500

....the letter which follows was dictated to me by Norton Nov.1921."

The accession folder contains correspondence covering the letter which was obtained from the Regional Plan Association.

A sub-series of 8 file folders has folder tabs bearing letter designations from "Ba-Bh" to "Se-Sm". It contains correspondence to the Committee and Association 1921-1931 on a variety of subjects and is arranged by surname of correspondent.

Possibly the most significant sub-series is 41 file folders of procedural and operational files of the Committee on the Regional Plan of New York and Environs; its successor Regional Plan Association Inc. for the period 1921-1934. Included are files of the Committee minutes Sept. 1921-Feb. 1930, Committee staff minutes Jan. 1922-May 1928, auditors reports, finance and budget files, staff memos, etc. Policy and organizational matters are covered in this sub-series and of interest is the 1925 issue of highways on Long Island, especially the Long Island Parkway, that brought an encounter between the Committee and Robert Moses. One justification for not here attempting to separate the files of the Committee and the Association is found in a letter by Lawrence Ortom, General Secretary, Regional Plan Association to the American Civic Association 11 May 1932 (file folder "Amer. Civic Assoc.", box 43, #2688):

With the completion of Plan Volume II, "The Building of the City", in December, 1931, the Regional Plan Committee's task was finished. Its staff has been merged with that of the Regional Plan Association in order to keep the Plan an up-to-date and effective guide..."

There is one file folder of correspondence 1922-1924 with folder heading "HQ 1:17" but this designation recurs in other boxes.

Ten numbered files cover 1922-1926 and might possibly be identified as the files of the Committee secretary since correspondence by first Frederick Heppel and then Thomas Adams consistently recurs. The scope of the Regional Plan is an important topic discussed in this correspondence.

There are 12 files of correspondence, speeches, proceedings, mailing lists, etc. 1922-1931 all designated "PR 2" with a numerical arrangement, a designation that reappears in 4 other boxes. The general topics appear to be meetings and conferences, including those of the Regional Council (established 1925). It is conjectured that PR stands for public relations.

The justification advanced for creating a sub-series of 12 file folders of correspondence 1923-1929 arranged alphabetically by the name of the correspondent on the file tab is that material is so often requested by name and lacking any comprehensive arrangement of files or index, a separate sub-series keeps the correspondents' files manageable. Otherwise, a case could be made for consolidating these files with the 41 procedural and operational files. Frederic Delano correspondence and correspondence from other important planning figures is found here.

There are 9 file folders of correspondence, reports, memoranda etc. 1925-1932 chiefly from other associations such as the Planning Foundation

Foundation of America, the American Civic Association and 2 files from the Philadelphia Regional Planning Federation which was engaged in a regional planning project at the same time as the Regional Planning Assoc.

Because of the gap in time, a separate sub-series was made of 3 file folders of correspondence on airports 1945-1949.

Box 44 also contains one package of glass photographic plates in a design pattern, dated 1924.

It must be reiterated that such a small portion of the Regional Plan records are examined here that it is hazardous to draw conclusions although some very interesting material is included. The correspondence covers, among other things, the visit of Raymond Unwin in 1922, ^{and} the appointment of Thomas Adams as Director of the Plan and Survey, a post he held from 1923 until March 1930 when he became a consultant. Adams also apparently acted as secretary to the Committee. There are numerous references not only concerning the scope of the Plan but also what effectuation of the Plan proposals would be sought and what the political involvement of the Committee would be. Much of this discussion centers around the person of Col. William Wilgus and also his specific proposal for a Sandy Hook--Rockaway Beach Causeway. Thomas Adams wrote Wilgus 3 Nov. 1925 (Box 43) "proposals must not go beyond what intelligent and broad-minded citizens consider to be reasonably practical and yet they must deal with problems and conditions in the future". Adams asks Wilgus to recognize that no plan can be complete and that proposals must be capable of being carried out in parts. In the Minutes of the Committee of 19 Jan. 1926 (Box 43) it was "decided that that portion of the plan of Col. Wilgus which contemplates a causeway from Sandy Hook to Rockaway Beach be omitted from the Regional Plan being prepared by the staff." Later in a memo to Leslie Baker 27 Nov. 1926 (file folder "Finances and Budgets", Box 43), Adams says "At the suggestion of Mr. de Forest it was generally agreed that the

Plans of the Committee should not show the Causeway from Sandy Hook..."

Predating the famous exchange in the ^{New Republic} ~~Survey Graphic~~ of 1932 between Adams and Mumford on the publication of the Plan and Survey are comments by Adams on Mumford's attitude. On 25 Feb. 1926 Adams wrote Mrs. Theodora K. Hubbard (file folder Mrs...Hubbard, Box 44):

The only instance I know of where there has been disappointment expressed has been in the group which included Mr. Mumford, Mr. Stein and Mr. Wright. We have proved to them that they were wrong and Mr. Mumford has apologized for making inaccurate statements in his articles.

And again Adams wrote Mumford on 27 Jan. 1930 (file folder "MO-My", Box 44):

I am surprised that you should say that we have the growth and maintenance of land values as an end in view because one of our chief ends has been to destroy the fallacy that land values matter at all when human values are at stake.

*Trans. 2688
#2822*

Introduction

Accession ~~#2822~~ of The Regional Plan Association records ^{did} contain 15-16 inch boxes. It contains New York region county reference files, some scrapbooks, subject files of printed matter and printed material from the R.P.A. library. The listing is basically a box listing, subdivided according to four subseries above and the library material alphabetized.

Box Listing of New York Region County Reference Files

There is a subseries on the counties of New York and New Jersey in the New York metropolitan region. These files fill 11-16 inch boxes with mostly printed reference material such as: zoning ordinances, building ordinances, subdivision regulations, clippings, some correspondence and a few special studies; all arranged alphabetically by name of either township, village or borough. There are also county files. There is some attempt at color coding: blue folder tabs being used consistently for files of ordinances and pink tabs for the heading "Government Organization & Finance" [sic] and other headings. The comprehensive dates of the subseries are 1933-1964 but many of the publications date from the 30's and there is correspondence from the mid 1950's. It would appear from the correspondence that the R.P.A. librarian wrote all the units of local government about 1960 asking for these publications. Worth noting as an example of R.P.A. work is a special study made for Cornwall, N.Y. by Henry Fagin, Hugh Pomeroy, and Christopher Tunnard.

Subject Files

There are 12 subject files, in original folders, some of printed material that may have been assembled by the library for research or study purposes, and two dealing with Regional Planning publications for New York metropolitan area counties. It is possible that these files, especially the latter ones, may be part of larger series. The topics on folder tabs covered include: zoning, housing, legislation of other countries, and a historical review of planning from a collection of journal articles (clipped & offprints) by famous planners from 1919 to 1962.
