

BARNABY & MOOERS'
PATENT
Side-Hill and Level-Land Plough,
TO WHICH

Has been awarded the following, and several other Premiums, viz:

By the AMERICAN INSTITUTE, at their Ploughing Match at Newark, N. J. 1840, the first premium, a SILVER CUP.

Also, by the SAME INSTITUTE, at their Annual Ploughing Match for 1841, at Sing Sing, N. Y. a GOLD MEDAL, for the best work done, lightest draught, and best principle of construction, answering for "general purposes."

The NEW YORK STATE AGRICULTURAL SOCIETY, awarded it an Honorary Premium of \$30, and equal to the first, at their Annual Ploughing Match at Syracuse, for 1841.

The following are its advantages over the common Plough, viz: 1st. Ease of draft. 2d. Perfection of work. 3d. Strength and durability. 4th. All dead furrows may be prevented, as the furrows can all be turned one way. 5th. Any width of furrow may be turned between 8 to 18 inches, by moving the catches in the cross piece, toward the handles for a wide furrow, and toward the centre for a narrow one. 6th. Placing the beam in the centre of the cross piece makes it a "double mold board plough," turning a furrow both ways at the same time, answering for green ridging, ploughing between corn or potatoes, or any crop cultivated in rows or drills, and for digging potatoes.

The undersigned, of Ithica, Tompkins Co. N. Y. is at present the sole proprietor of the Patent for the States of Vermont, N. Hampshire, Pennsylvania, Maryland, Virginia, S.
